Office 365

pulse

In Development

Featured ID	Description	Details	Status	Tags - Products	Tags - Platform	Tags - Cloud Instance
53191	Outlook for Windows: calendar sync protocol transition to REST API	The new sync protocol will make your RSVP responses to meetings visible in the Tracking Status for organizers and attendees, even if you chose not to send a response, as well as the details of past events of a recurring meetings will not change if the end date of a series is updated.	In development	Outlook, Exchange	Windows Desktop	
54285	MyAnalytics Dashboard is coming to more Microsoft 365 Government and Office 365 Government suites	The MyAnalytics Dashboard will be made available to everyone using Office 365 and Microsoft 365 Government suites that include Exchange Online, specifically Microsoft 365 E3, Office 365 E3 and E1.	In development	O365	Online	GCC
54286	MyAnalytics Email Digest is coming to more Microsoft 365 Government and Office 365 Government suites	MyAnalytics Email Digest will be made available to everyone using Office 365 Government and Microsoft 365 Government suites that include Exchange Online, specifically Microsoft 365 Government E3, Office 365 Government E3 and E1.	In development	O365	Online	GCC
54391	Outlook for Android: Location, meeting time and the ability to RSVP in notifications	Expand your Outlook calendar notification to RSVP, see the location and meeting time. 	In development	Outlook	Android	
54433	Automatic phishing detection for enterprise in-org forms	Microsoft Forms is a simple, lightweight app that lets you easily create surveys, quizzes, and polls. In order to make Forms a more secure service, we have enabled automatic phishing detection on all public forms in July. Now we'd like to provide this feature to enterprise in-org forms as well for better protection.	In development	Microsoft Forms	Online	
54448	Microsoft Planner for Microsoft 365 Government DoD	Planner is a simple, intuitive, and collaborative work management tool that helps teams visually organize their work and reach shared goals. Planner will be available in Microsoft 365 Government DoD.	In development	O365, Planner	Online	DoD
54465	Recommendation to re-use historical forms	When a user starts to type in the forms title field, Microsoft Forms will recommend questions based on the user's historical forms. The user would see only their own forms and questions.	In development	Microsoft Forms	Online	

Rolling Out

Featured ID	Description	Details	Status	Tags - Products	Tags - Platform	Tags - Cloud Instance
16617	Comments and notifications on non-Office files (SP and ODB)	With your files stored in OneDrive and SP, you now have the ability to add comments to files as part of your review process. This feature will allow you to work together not just in Office documents but with photos, CAD drawings, PDF's and more.	Rolling out	OneDrive for Business		Worldwide (Standard Multi-Tenant)
49083	OneDrive Mobile :Updated Recent View	Improved recent files experience in ODB mobile app that you can see in all Office end points including Scans & PDFs . (It will also help you navigate between PDFs in an easier manner)	Rolling out	OneDrive for Business		
49084	Updated UI for PDF annotations	With PDFs, either as a native PDF file uploaded into OneDrive or when you scan an item like a whiteboard, receipt or business card, you can annotate the PDF to circle items or add notes for you and others. We are updating the user interface when you go to add your annotations, to give you more options and for it to be friendlier to use.	Rolling out	OneDrive for Business		
49085	Updated design (align w/ Mobile Coherence)- iOS	Refresh look and feel of OD iOS app to align more closely to other Office apps	Rolling out	OneDrive for Business		
50420	Outlook for Android: People contact information	Detailed contact information about people in your organization (people card) including organizational reporting structure for businesses, people they work with or those you email with frequently.	Rolling out	Outlook	Android	
53230	Updated settings interface for OneDrive mobile app(iOS)	App settings page will be refreshed to make configurations simple and more accessible . "Camera Upload" settings will also be updated to give users more control over various features.	Rolling out	OneDrive for Business		
53994	Enhanced filtering for connectors	This feature will help organizations that have complex mail routing set ups. This basically means that your MX record does not point to Office 365 EOP and you receive mail through an inbound connector. Properly configured connectors are a trusted source of incoming mail to Office 365, but connectors aren't necessarily the true source of messages and obfuscates the sender information. Enhanced filtering for connectors is a feature that allows you to filter email based on the actual source of messages that arrive over the connector. This is also known as skip listing and this feature will allow you to overlook, or skip, any IP addresses that are considered internal to you in order to get the last known external IP address, which should be the actual source IP address resulting in improved effectiveness. We believe that this feature will help those customers that aren't fully leveraging EOP/ATP's full value to show why you could or should move your MX record to EOP.	Rolling out			All environments
54528	Teams meeting recording tab	Easily locate your Teams meeting recordings with the new meetings tab in Stream. In Stream, simply navigate to 'My Content' and select the 'Meetings' option to access all your recorded Teams meetings.	Rolling out	Microsoft Stream		

Launched

Featured ID	Description	Details	Status	Tags - Products	Tags - Platform	Tags - Cloud Instance
46145	Outlook on the web - suggested attachments	Outlook will now suggest relevant files you can attach when you respond to an email and click on the -Attach- paper clip drop down icon.	Launched	Exchange	Online	Education, Worldwide (Standard Multi-Tenant)
53140	Recycle Bin for Microsoft Stream Videos	Microsoft Stream videos will be saved in a recycle bin for 30 days after initial deletion.	Launched	Microsoft Stream
